

Cable clamp Ø 19,0 mm PA

Part no.

11218238

- The OD (Overall Diameter) of OPGW cable determines the size of the cable clamps to be selected from this table. An OPGW cable with OD 10.7 should be mounted with cable clamp Part No: 11 218 255 10.0 mm. Aluminium clamps are preferred, but if a size is missing or if the ground cable should be fixed, the PA type is used. The ground cable can either be fixed by itself or routed in a protection PA hose diam. 25 mm. For this purpose the 1×25 to 4×25 clamps are used.
