

Joint Closure TBK8

Part no.

11160801

Distribution point up to 8 standard cables.

Joint Closure TBK8 facilitates mid-span access without the need to cut and re-splice all the fibres in the cable. The closure is delivered with one oval cable inlet and two pre-sealed ports, ID 27 mm and six pre-sealed ports, ID 22 mm. The closure is equipped with cable strength member clamps, splice protectors and Multicassette.

Joint Closure TBK8 is available in two different sizes, depending on the total number of fibres to be spliced and the number of fibres per cassette. The number of fibres will determine the number of cassettes. Please choose a suitable joint closure for your fibre cables as specified in the table below. Brackets for attachment on walls, racks, in manholes or on poles, are available as options and ordered separately.

Together with a locking cap, the closure can easily be locked with a padlock. The closure TBK8 is delivered with heat shrink tube + branch-off clip for the oval inlet and with the articles specified in the table basic configuration.
